Speed Velocity and Acceleration Worksheet Answer Key

The physics teacher walked a distance of 12 meters in 24 seconds; thus, her average speed was 0.50 m/s.

File Type PDF 112

Speed And

Velocity Answers

However, since her displacement is 0 meters, her average velocity is 0 m/s.

Remember that the displacement refers to the change in position and the velocity is based upon this position change. In this case of the teacher's motion, there is a position change of 0 meters and thus an average ...

Speed versus

Velocity - Physics

For example, 50 km/hr (31 mph) describes the speed at which a car is traveling along a road, while 50 km/hr west describes the velocity at which it is traveling.

The mathematical calculation for speed is relatively

straightforward, wherein the average speed of an object is calculated by dividing the distance traveled by the time it took the
