can borrow free Kindle books from your library just like how you'd check out a paper book. Use the Library Search page to find out which libraries near you offer OverDrive.

### **B737 Overweight Landing**

Why land overweight? Whilst many aircraft can jettison fuel using a fuel dump nozzle, a number of types do not have this capability. Generally, the shorter the range of the aircraft, the less need it has for a fuel jettison system. Notable aircraft which do not feature fuel jettison capabilities are the Boeing 737, the Boeing 757 and the Airbus A320.

Maximum Take Off and Landing Tailwind Component 15 kts  
Maximum Operation Altitude 41,000 ft Maximum Takeoff and Landing Altitude 8,400 ft Maximum demonstrated take off and landing crosswind is 33 kts (with winglets) or 36 kts (no winglets). Maximum difference between Captain and First Officer altitude is 75 feet. Maximum cabin pressure is 9.1 psi.

### **Boeing 737-700/800 Flight Crew Operation Manual**

The Boeing 737 is a narrow-body aircraft produced by Boeing Commercial Airplanes at its Renton Factory in Washington. Developed to supplement the Boeing 727 on short and thin routes, the twinjet retains the 707 fuselage cross-section and nose with two underwing turbofans. Envisioned in 1964, the initial 737-100 made its first flight in April 1967 and entered service in February 1968 with Lufthansa.

## **Boeing 737 - Wikipedia**

An overweight landing is defined as a landing made at a gross weight in excess of the maximum design (i.e., structural) landing weight for a particular model. A pilot may consider making an overweight landing when a situation arises that requires the airplane to return to the takeoff airport or divert to another airport soon after takeoff.

## **AERO - Overweight Landing? Fuel Jettison? What To Consider**

If the selected runway for your overweight landing is long enough and the weather is calm (so a smooth landing is easier), an overweight landing is not such a problem. Now let's look at the 777-300ER in detail. I use the figures from Wikipedia, because the manufacturer's site is trying much harder to hide the relevant data. The MTOW (maximum ...
