Bollinger Bands John A

Bollinger Bands are a technical trading tool created by John Bollinger in the early 1980s. They arose from the need for adaptive trading bands and the observation that volatility was dynamic, not static as was widely believed at the time. Bollinger Bands can be applied in all the financial markets including equities, forex, commodities, and futures.

John Bollinger's Official Bollinger Band Website

Now, in Bollinger on Bollinger Bands, John Bollinger explains the market conditions that led to his initial discovery, and gives readers the inside story of the development and refinement of Bollinger Bands. He then goes on to present a relative decision framework built around Rational Analysis and Bollinger Bands--an extraordinarily powerful combination of technical and fundamental analysis that answers the question of whether prices are too high or too low for virtually any security or ...
