Abstract. The main aim of the chapter is to discuss the case study method. We shall begin by confronting its definition. It is quite a challenge, as researchers representing various paradigms embark on this type of research project. These paradigms define the way we perceive the explored reality, our chances of understanding/cognizing it, and the

A case study is a detailed study of a specific subject, such as a person, group, place, event, organization, or phenomenon. Case studies are commonly used in social, educational, clinical, and business research. A case study research design usually involves qualitative methods, but quantitative methods are sometimes also used.
