World War. This military engineering activity resulted in a number of commercial ventures after the war, in particular the Decca Navigator System, and the Decca Radar company.

## **Decca Radar - Wikipedia**

The Decca Navigator System was a hyperbolic radio navigation system which allowed ships

# Download Ebook Decca Radar Wikipedia

and aircraft to determine their position by receiving radio signals from fixed navigational beacons. The system used phase comparison of two low frequency signals between 70 and 129 kHz, as opposed to pulse timing systems like Gee and LORAN.
