Before each lab session, you should prepare by reading the lab manual and the textbook required reading. We expect you to have a good understanding of the purpose, details of the procedure, the use of all chemicals and any significant hazards, and the underlying science of the experiment when you come to lab.

Analytical Chemistry Lab Manual
An important part of chemistry involves studying energy changes that occur during chemical reactions. These energy changes are of fundamental importance in understanding the "driving force" of a chemical reaction. The most common way energy is exchanged between a chemical system and the environment is by evolution or absorption of heat (q).
