Risk Management Plans for each organizational activity.

Management of Risk: Guidance for Practitioners

Risk – is a combination of the likelihood (i.e. the chance of it happening) and the severity (i.e the potential outcome) that something will have a negative impact.
Risk matrix – part of the risk assessment form which helps people to decide on the actual level of risk for their activity/ environment/ process.

Management of Risk Assessment

1.6The management of risk at strategic, programme and operational levels needs to be integrated so that the levels of activity support each other. In this way the risk management strategy of the organisation will be led from the top and embedded in the normal working routines and activities of the organisation.
