Bartleby eBooks: a huge array of classic literature, all available for free download.

Plant Breeding Allard

As ancient as agriculture itself, plant breeding is one of civilization's oldest activities. Today, world food production is more dependent than ever on the successful cultivation of only a handful of major crops, while continuing advances in agriculture rely on successfully breeding new varieties that are well-adapted to their human-influenced ecological circumstances.

Principles Of Plant Breeding: Robert W. Allard ...

Robert "Bob" Wayne Allard was an American plant breeder and plant population geneticist who is widely regarded as one of the leading plant population geneticists of the 20th century. Allard became Chair of the Genetics Department at University of California, Davis in 1967; he was elected to the National Academy of Sciences in 1973, and was awarded the DeKalb-Pfizer Distinguished Career Award and the Crop Science Science of America Award. He was honored as the Nilsson-Ehle Lecturer of the Mendeli

Allard, R. W.: Principles of Plant Breeding. J. Wiley ...

Plant breeding is an ancient activity, dating to the very beginnings of agriculture. Probably soon after the earliest domestications of cereal grains, humans began to recognize degrees of excellence among the plants in their fields and saved seed from the best for planting new crops. Such tentative selective methods were the forerunners of early plant-breeding procedures.
