Setup the SRV02 in the high-gear configuration as explained in [5]. 2. Place the gyroscope module on top of the SRV02 plant such that the servo output shaft inserts the hole on the bottom platform of the gyroscope module and it can freely rotate about the shaft. Fill out the form and get access to the lecture slides and problem sets developed with modern pedagogy approaches in mind. The Rotary Servo Base Unit is the fundamental element of the Quanser Rotary Control experiments. It is ideally suited to introduce basic control concepts and theories on an easy-to-use and intuitive platform. Use it on its own to perform several experiments, or expand the scope of this unit by adding on other modules to teach an even wider ...
