Value chain analysis is a strategy tool used to analyze internal firm activities. Its goal is to recognize, which activities are the most valuable (i.e. are the source of cost or differentiation advantage) to the firm and which ones could be improved to provide competitive advantage. In other words, by looking into internal activities, the analysis reveals where a firm's competitive advantages or disadvantages are.

Value Chain Analysis | SMI

A value chain is a set of activities that a firm operating in a specific industry performs in order to deliver a valuable product for the market. The concept comes through business management and was first described by Michael Porter in his 1985 best-seller, *Competitive Advantage: Creating and Sustaining Superior Performance*. The idea of the value chain is based on the process view of organizations, the idea of seeing a manufacturing organization as a system, made up of subsystems each with input.

Value chain - Wikipedia
